

Patient Testimonial

“Both my Children, 14 years and 11years old, have gotten Orthotics while being patients of Dr Sitzmann. Both of my children sadly have flat feet (no need to use the fancy term, for a simple thing).

My daughter had gotten orthotics while in care of our prior Chiropractor in California, but back then the inserts were very rigid and not at all easy to break in, let alone want to wear them. She had a bad experience with the Orthotics, so when she got these she was, like, "wow" these are great. They had no trouble whatsoever; they actually were quite amazed as to how fast they could feel a positive improvement in their arches.

Both of my Kids loved seeing their "stinky feet" being scanned in to the computer and come back in a colorful display. It was really interesting to watch.

Both the kids have had the inserts for about 3 months. Both my Kids are first in line to recommend the insert after this brilliant experience, the inserts, the quick turnaround for the insert to arrive, and the outstanding information and help from Ms Jenn and Dr Sitzmann.

Regards Hannah, Christian, and Mette Cano
